

MIKE_Mutch Creative Director

I think it, draw it, and make it happen.

I'm a Creative thinker, an integrated idea generator, a joy creator with a big eye for detail, and an ever-evolving technical know-how.

Working for over 20 years across the UK and MENA regions for small start-up agencies to the largest, global creative and production houses have taught me how to mix engaging omni-channel experiences to help build and transform brands.

With a very strong copywriting, creative direction, visualizing and Adobe backup, I'm truly hands on with my teams.

Believe + achieve: Personal statement

I believe my strengths are leading, motivating a creative growth from within, from the initial client briefing to creative solution presentations.

My expertise of building, inspiring, developing and leading teams of art directors, copywriters and production teams, both in person and remotely, guiding teams to develop strategic, engaging and insightful high-quality work every time.

Overall my team leading strengths are turning good into great, potential into performance, and a group of individuals into a team of winners.
